Subject: E-Waste Collection Drive – Building Responsible Future Citizens

Dear Parents,

Greetings from Woodlem Park Al Hamidiya Private School!

In today's rapidly advancing digital world, the responsible management of electronic waste (e-waste) has become an essential part of environmental education. As a school, we believe that sustainability is not just a topic to be taught, but a value to be lived and practiced. Inculcating awareness about e-waste and encouraging its proper disposal is an important step in shaping environmentally responsible and conscious young learners.

In line with this vision, the Student Council has taken a commendable initiative to launch an E-Waste Collection Drive, which will be implemented in full swing from the second term. To begin this meaningful journey, **we are pleased to announce that Thursday, 25 June 2026 will be observed as the E-Waste Collection Drive Day at Woodlem Park Al Hamidiya Private School.**

On this day, every student from Kindergarten to Grade 10 is expected to bring at least one piece of e-waste from home—this may include old batteries, damaged chargers, unused earphones, broken electronic gadgets, or any small electronic devices.

To encourage active participation and healthy engagement, the drive will include recognition and appreciation:

- The class collecting the maximum e-waste will be awarded.
- The student contributing the maximum e-waste will also be specially recognized and awarded.

We seek your wholehearted support in motivating your child to participate in this initiative and to help them understand the importance of responsible disposal and environmental care.

Together, let us take a small step towards a cleaner, greener, and more sustainable future.

Warm Regards,

Principal
